

Leaking Diverter Valve Shower

Leaking Diverter Valve Shower - The shower diverter valve takes water from the main supply in your home and redirects it to your bathtub faucet, shower head, and potentially more sites as well. If you have a leaky faucet in the tub, it is likely that you'll need to fix a leaking shower diverter in order to remedy the problem. Typically, this is an easy task. How to Fix a Leaking Shower Head. A leaking shower head can be costly and annoying. If yours happens to be leaking, there could be one of many reasons why. But this doesn't mean you have to call for a plumber. The solution might be easier...I replaced my Price Pfister shower valves, including diverter, and I cannot stop the slow drip from the spout into the tub. I am a novice DIY'er with an older 1930's triplex. Replace Shower Diverter in Leaky Tub Spout. So, you're taking a shower, and you notice the spray is weak. When you look down, you see that not all of the water from your pipes is making it to your shower head.
